Summary

A Computer Engineering graduate specializing in **Machine Learning**, **Data Science**, and **Generative AI**, with hands-on experience building end-to-end systems, from **edge/IoT** platforms with RNN anomaly detection to **multi-agent LangChain** applications and **full-stack** stock analysis with backtesting. Brings independent **equity research** and **valuation** experience. Seeking an entry-level role in **AI/ML**, **Software Development**, or **FinTech**.

Education

University of Mumbai Nov 2022 – May 2026
Bachelor of Engineering in Computer Engineering

Experience

FlyRank AI Jul 2026 – Aug 2026
Machine Learning Engineering Intern

- Cleaned and engineered features from **anonymized search-ranking data** using Python, Pandas, and Scikit-learn as part of FlyRank’s applied ML program.
- Trained and compared **Logistic Regression**, **Decision Tree**, and **Random Forest** classification models to identify web pages that need a content refresh.

Prodigy Infotech Dec 2023 – Jan 2024
Web Development Intern

- Built and deployed **5+ responsive web applications** using HTML, CSS, JavaScript, and REST APIs, optimizing UI responsiveness and API integration to deliver consistent performance across **3+** major browsers and mobile/desktop devices.

Technical Skills

Languages: Python, SQL, JavaScript, TypeScript, C, HTML, CSS
ML & Data Science: Scikit-learn, TensorFlow, Keras, NumPy, Pandas, Deep Learning, Natural Language Processing (NLP), Time-Series Analysis, Feature Engineering, Exploratory Data Analysis (EDA), Power BI
Generative AI: LangChain, LlamaIndex, Hugging Face, Retrieval-Augmented Generation (RAG), LLM, AI Tool, Prompt Engineering, ChromaDB
Frameworks & Tools: FastAPI, Flask, Node.js, Express.js, Next.js, Streamlit, REST APIs, Git/GitHub
Cloud & Databases: AWS, Google Cloud, Docker, Kubernetes, CI/CD, MongoDB, MySQL, Firebase
Finance & Analytics: Equity Research, Valuation, Financial Data Analysis, Backtesting, SMA/RSI Indicators

Projects

- AquaSense Edge | IoT, ESP32, Raspberry Pi, Python, RNN, AprilTag | Industry Collaboration
- Engineered a real-time **IoT aquaculture monitoring system** on an ESP32 + Raspberry Pi stack, tracking **5+ aquaculture parameters** with local data storage and live dashboard visualization.
 - Transitioned fish-length estimation to AprilTag-based measurement, **cutting calibration time by 70%**, and integrated an RNN pipeline for early anomaly detection.
- AgenticResearch | Python, LangChain, Tavily API, BeautifulSoup, Streamlit | GitHub
- Architected a **4-agent LangChain pipeline** (Search, Reader, Writer, Critic) with Tavily web search and BeautifulSoup extraction, automating research end to end from live web search to a finished report.
 - Built a **Streamlit dashboard** with live monitoring of all **4 agents**, execution tracking, and report downloads.
- StockAnalyzer | Python, FastAPI, Next.js, TypeScript, Backtesting | GitHub
- Developed a **full-stack FastAPI + Next.js platform** with **SMA20/50** trend analysis, **Buy/Sell/Hold** signals, news-sentiment classification, and multi-stock comparison dashboards.
 - Built a Python **backtesting module** for an **SMA/RSI strategy**, evaluating **returns**, **max drawdown**, and **win rate** with full trade-level results.

Certifications

- IBM Data Fundamentals Credential
- Udemy – Data Science, Machine Learning, Deep Learning & NLP Credential
- AWS Cloud Practitioner Essentials Credential
